

# SKB NAWAZ

QA Automation Engineer | Playwright | API Testing

+91-9014373336 | skbnawaz369@gmail.com

---

## PROFESSIONAL SUMMARY

QA Automation Engineer with 4+ years of experience in Manual Testing and Playwright Automation, Experienced in building Playwright frameworks using TypeScript and JavaScript, using AI tools to draft test plans and automation scripts, validating APIs with Postman and Playwright API Testing, and verifying backend data with SQL. Hands-on with CI/CD integration, defect management, and Agile Scrum across e-commerce and banking domains. Proven record of reducing manual regression effort and improving release reliability through automation.

## TECHNICAL SKILLS

**Automation Testing:** Playwright, Selenium (Basic)

**Programming Languages:** TypeScript, JavaScript

**Automation Frameworks:** Playwright Test, Page Object Model (POM)

**Databases & Database Testing:** MySQL, SQL

**CI/CD:** Azure DevOps Pipelines, Jenkins, GitHub Actions

**Version Control & Build Tools:** Git, GitHub, Node.js, npm

**Reporting:** Allure Reports, HTML Reports

**Test Management & Defect Tracking:** Jira, Azure DevOps

**Testing Types:** Functional, Regression, Smoke, Sanity, Integration, End-to-End, API, Database, Cross-Browser, UAT

**AI Productivity Tools:** Playwright MCP, GitHub Copilot

**Methodologies:** Agile (Scrum), SDLC, STLC

## PROFESSIONAL EXPERIENCE

---

**QA Automation Engineer** Oct 2022 – Present

### *Mphasis*

- Analyzed business requirements, user stories, and acceptance criteria to define test scope and identify automation opportunities.
- Built Playwright (TypeScript) automation frameworks from scratch using the Page Object Model, and integrated the suites with CI/CD for continuous testing.
- Used AI tools (Claude, Playwright MCP) to draft test plans and generate automation scripts, reviewing and refining the output before adding it to the suite.
- Used GitHub Copilot to debug failing tests and speed up troubleshooting of script and locator issues.
- Participated in Sprint Planning, Backlog Grooming, Daily Stand-ups, Sprint Reviews, and Retrospectives; collaborated with Developers, BAs, Product Owners, and DevOps teams.

### **Project 1: Retail E-Commerce Platform**

**Client:** Burberry (Confidential Retail)

**Domain:** E-Commerce & Retail

**Role:** QA Automation Engineer (Playwright)

**Duration:** 3 Years

**Tools:** Playwright, TypeScript, JavaScript, Postman, MySQL/SQL, Jira, Git, Azure DevOps Pipelines, Allure Reports

**Description:** E-commerce application for product search, wishlist, cart, secure payments, order tracking, returns, and refunds, with Web and REST API layers integrated with Payment Gateways, Inventory, Shipping, and Promotional Services.

- Automated UI and API test cases in Playwright (TypeScript, POM) covering Product Search, Cart, Checkout, Payment, Order Management, Returns, and Refunds.
- Tested REST APIs using Postman and Playwright API Testing across key endpoints (Cart, Checkout, Payment, Order, Returns/Refunds), validating HTTP methods, status codes, headers, response body, and JSON schema.
- Handled token-based authentication and chained dependent requests (cart → checkout → payment → order status) by passing data between calls.
- Designed positive and negative API scenarios (invalid payloads, missing or expired tokens, boundary values) and verified backend data against API responses using SQL queries.
- Automated end-to-end workflows: Login, Product Search, Cart, Checkout, Payment, Order Placement, Order Tracking, Returns, and Refunds.
- Executed Functional, Regression, Smoke, End-to-End, API, Database, and Cross-Browser Testing across Chromium, Firefox, and WebKit.
- Integrated Playwright suites with Azure DevOps Pipelines, running regularly for continuous testing, and generated Allure Reports for release validation.
- Reduced regression execution time through parallel execution and cut manual regression effort by approximately 70%.
- Logged and tracked defects in Jira, catching defects before production; supported UAT, Production Smoke Testing, and Hotfix Validation.

## **Project 2: Digital Banking & Payments Platform**

**Client:** Lake City Bank

**Domain:** Banking & Financial Services

**Role:** QA Engineer (Manual Testing)

**Duration:** 1 Year

**Tools:** Postman, SQL, Jira

**Description:** Digital banking platform covering Account Management, Fund Transfers, Bill Payments, Beneficiary Management, Loan Servicing, Statements, and Transaction History, integrated with Core Banking, Payment Gateways, Fraud Detection, and Compliance systems.

- Analyzed BRD, FRS, and user stories to identify end-to-end test scenarios.
- Designed and executed test cases for Fund Transfers, Beneficiary Management, Bill Payments, Account Statements, and Transaction History.
- Executed Functional, Integration, System, Regression, Smoke, and User Acceptance Testing (UAT).
- Validated REST APIs in Postman by verifying request and response data, status codes, and error handling against business requirements.
- Verified customer information, transaction records, and account balances using SQL queries.
- Logged, tracked, and verified defects in Jira with developers; supported production releases through Smoke Testing, Hotfix Validation, and Post-Deployment Verification.

## **EDUCATION**

**Bachelor's Degree** Graduated: 2022

*SRIT College, Anantapur, Andhra Pradesh*
